A letter to my students about the 2002-03 school year

August 4, 2002

Students,

This will be an exciting year for all of us. This year I will be working a "National Board of Professional Teaching Standards" certification; a complex and rewarding process to improve teaching.

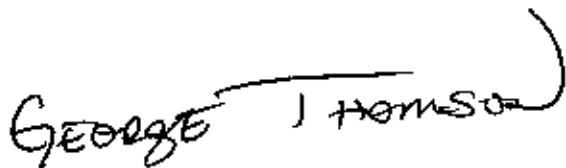

As part of this certification process, I will be focusing closely on your work so that I may tailor my instruction to fit your needs. Also as part of the certification process I will be asking for your permission to videotape the class so that I may analyze my teaching as it happens.

I believe strongly that education is a right. I also feel the professional responsibility to achieve the highest level of training so that I may be a better teacher for you.

School is a wonderful place as it creates opportunity. Without schools nearly all of us would be under the thumb of someone more powerful. Education is freedom.

Work hard at your education, don't let it slip away; every second counts. Your life is a treasure.

Sincerely, _

A handwritten signature in black ink that reads "George Thomson". The signature is written in a cursive style with a long horizontal line extending from the "G" and a large loop at the end of the "n".

A letter to my students

My teaching philosophy

*The storyteller makes no choice -Soon you will not hear his voice
His job is to shed light and not to answer. Jerry Garcia*

As your teacher I feel that my job is to shed light, not to give answers. I hope that I challenge you, and that you find this course valuable. Every topic studied in class can be applied out of class in a variety of situations. No matter what you choose to do with your life, the government and the economic system will affect your life deeply. For that reason you must understand what is going on in the government and economy so you can make it work for you rather than you working for it.

The government and economics curriculum is designed to give students a fundamental knowledge of the basic principles and institutions of United States and Arizona government and economy. I will focus also on our local government in an attempt to demonstrate the power of one citizen on her government and how one person can make the economy work for them. You will learn how the laws of supply and demand affect everything.

The course theme is "The role of governmental and economic principles in lives of individuals" In the process of exploring this theme, the required Arizona Standards in Civics, Government and Economics and will be covered.

For American History the course themes are, "using the past as a tool to succeed in the present."

Preparation for the Senior Exhibition will be an important component of this class. The skills a student exhibits in the Senior Exhibition process are central to success in the world. I am proud of the students who have completed their Senior Exhibitions at Nogales High School. I seek to give the future citizen the skills and knowledge to be functioning members of the polity and economy.

In this class you will work in groups, write position papers, complete simulations, take traditional notes and quizzes, be expected to demonstrate and exhibit learning through portfolios, use technology and go beyond the class for learning. Through these activities, I will do my best to get you ready for the world outside this school.

One of the major assumptions of the class is that it will be student, not teacher, centered. This means that you will be active participants in the learning process. The course will be project oriented with students serving as worker and the teacher acting as the coach. I am not the deliverer of information you are the discoverer of new ideas. Only through individual initiative can knowledge be gained.

Above all you will learn to use your minds well. You will hear me talk endlessly about the "habits of mind." Habits of mind are ways of learning to use your mind well. I want to teach you how to think not what to think.

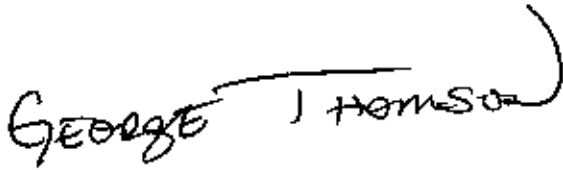

The theme for our class is: The Individual and the Government. How much do we need government to organize and protect our society and culture?

We have one rule in the class, it is "Trust until abused" I trust you until you show me that I shouldn't. You are an adult.

I look forward to teaching you. Please review all the information in this packet closely. We will refer back to it often in the class.

Your life is a treasure.

Sincerely,

A handwritten signature in black ink that reads "George Thomson". The word "George" is written in a cursive style, and "Thomson" is written in a more blocky, slightly cursive style. A long horizontal line extends from the top of the "T" in Thomson across the page.

George Thomson
Instructor

Grading, expectations and procedures

My Office Hours

You can find me in room A3 nearly every lunch hour. I am also available Mondays, Tuesdays and Thursdays from 2:15 to 2:45. Feel free to call me at home, before 9PM, or email me with questions at gthomson@nUSD.k12.az.us

Class Web Page

Teachweb.org is a valuable resource for you; it is our own class web page, for my classes only. The page has articles, assignments, practice tests, class info and lots of other interesting things. Check the page regularly. The address is:

From home

www.teachweb.org

From School:

www2.nUSD.k12.az.us/nhs/gthomson.class

Attendance

All school policies regarding tardies and absence will be enforced. In class:

On the fourth tardy you will receive an in-class punishment. On the 5th you will be referred to the office. The school policy for absences applies. On the fifth absent you will be dropped from the class. Call the teacher any time you know you will be absent. I will work with you to be sure you have the assignments missed.

Call the teacher any time you know you will be absent. I will work with you to be sure you have the assignments missed.

Late Work:

Late work is not acceptable. Assignments are due when they are due. Ten percent of the grade will be taken off for each day after the due date as assignment is turned in to the teacher. Major assignments which have had long assignment periods are due on the due date, whether the student is in school or not. Students who miss a test or quiz due to nonattendance will have to make up that assignment after tutoring time and can expect a different test or quiz (on the same subject) that the one given in

Resubmission of assignments:

I encourage to do your work over, and receive a higher. To do something over the following conditions must be met:

1. The original assignment must be turned in on time.
2. You must staple the original and the redo. I will return it to you un-graded without the original.
3. You have two days to redo the assignment from the day I pass it back to you. No redos accepted after two days.

Grading

Grading will be accomplished with a cumulative points system. Each assignment will be worth a specific number of points as determined by the teacher depending on the difficulty of the task. All assignments must be kept in the class notebook. The points earned in each nine weeks period of the semester will be used to determine your grade. The points of the first nine weeks will carry over to the second. The points in the third nine weeks carry over to the fourth. Listed below are the most common means of earning points:

1. Daily assignments, class participation, reading comprehension and listening skills. (daily assignments will include, but are not limited to: daily journal, vocab lists, bell work etc,)
2. Tests and quizzes- These will require you to express opinions, to discuss class content in more detail, and to explore topics contained in reading, but not covered directly in class. Test will include reading comprehension, spelling and vocabulary. Test will be given on a regular basis, at least three per month. Some tests will be major assignments, some will be quizzes worth fewer points.
3. Position Papers - These will require you to identify a clear thesis, express opinions, analyze problems, and provide evidence. All assignments must follow the YES TEST included. These are a major part of your grade.
4. Portfolios- There are two kinds of portfolios: Unit Portfolios and the big one, the "Senior Exhibition Portfolio." These are major grades and will be based on the unit Essential Question. You will take material from class and out of class work to make the portfolio. See the page in this document that describes portfolio. The teacher will assign each, one per unit. The Senior Exhibition portfolio is required for graduation and its components (as well as other assignments related to the Senior Exhibition) will be major grades in this class.
5. Article reviews: You will do a short writing that will review various articles. This is a minor assignment. Follow directions. Include the article stapled. State the thesis, or main point, give facts, quotes etc. which develop the these, take a stand on the issue. One page, may be written in first person.

Please see the official NHS Grading Scale which is posted in this classroom and in your student handbook. Semester grade Your semester grade will be determined from a total points basis of the semester (1st and 2nd or 3rd and 4th nine weeks added together).The semester final exam is worth 20% for you semester grade.

GRADING POLICY:

The grading scale described in the NHS student body handbook is referenced as part of this contract and is the grading policy of this class. No more than 5% of a grade may be earned in extra credit. The teacher will assign extra credit at his discretion. Extra credit may not be used to raise a grade from a F to a D . A cumulative total of both quarters

points will added to determine the semester grade, the final exam is worth 20% of the semester grade. I understand that my current grade will be based on the cumulative total of all points in the semester.

The grade of an "A" represents outstanding work which demonstrates leadership, original and critical thinking, proof of the ability to apply learning beyond the classroom, individual initiative, as well as participation beyond that assigned in the regular curriculum. A grade of an "A" will require hard work by the student and will include academic or civic challenges issued by the teacher

CLASS REQUIREMENTS:

1. Equipment. All students are required to bring their notebooks, pen/pencil, and assignments everyday. Students will not be allowed to go to their lockers to retrieve required class materials.

2. Behavior and participation. Student participation in classroom activities is necessary for the student who wishes to accomplish the most in any class. Being tardy to class is both rude and disruptive. The teacher will give equal treatment to all students. The class policy on tardies, as stated in this course's student handbook and course guide will be enforced.

3. Expectations -- One of the major assumptions of the class is that it will be student, not teacher, centered. This means that you will be active participants in the learning process. The course will be Exhibition oriented with students serving as worker and the teacher acts as the coach.

The student will visit the class web page at: www.teachweb.org regularly.

4. All assignments are due on the due date. If a student is absent the school policy applies, but they may receive a different assignment. All major assignments (which have had long range working time) must be turned in on the due date, no exceptions. The work must be brought in if the student is absent. A student may redo an assignment if the assignment is turned in on time. Assignments turned in after the due date will have 10% of the total possible points deducted. A student may resubmit his/her assignment for a re-grade if the assignment was turned in on time. The student will have two days to redo the assignment for a higher grade.

RULES OF BEHAVIOR:

1. You must have the necessary "equipment" for class, everyday. These are:
 - notebook, pen or pencil, text book, workbook, any assignment due on that day.
2. No one will be allowed to go their locker during class time. Remember to bring all your materials everyday.
3. Keep hands feet and objects to yourself.
4. No put-downs or teasing.
5. No profanity.
6. All attendance, tardy and make-up work policies as stated in the student handbook will be followed.
7. Follow directions the first time they are given.
8. No food or drinks allowed in the classroom.
9. All other class policies stated by the instructors in writing are referenced as part of this contract.
10. Students not in their assigned seat at roll call are considered absent.

US Government and Economics

Course Outcomes

At the conclusion of the course the students should be able to...

- apply and recognize those fundamental principles of government and economics that protect individual liberty, share power and provide safety for the individual.
- understand the relationship between rights and responsibility.
- become an active member of a community.
- understand how supply and demand affect all areas of price and production.
- apply governmental and economic principles to current events.
- develop habits of mind to use your mind well.
- improve skills of formal writing, speaking, communications, reading comprehension, goal setting and planning.
- understand that all knowledge is connected.
- develop a positive attitude toward intellectual activity and a desire for life-long learning.

US Government and Economics

Course Syllabus

G. Thomson — 2002-03

Course theme: The role of governmental and economic principles in lives of individuals.
Course Essential Question: "How is individual liberty best preserved?"

Dates are subject to change
AZ State Standards for Civics and Government listed

Unit I -- Class organization, goal setting, Senior Exhibition Introduction.
Essential Question: How is the class organized and what are the requirements?

Unit II - Fundamentals of Economics

Essential Question- How are a peoples' choices affected by scarcity?

Goal: To apply the basic economic problem.

Time- Weeks two and three of first quarter.

READ: Applied Economics Junior Achievement Chapters 1, 2 and 3.

4SS-P1. Analyze the implications of the economic problem of scarcity

4SS-P2. Use economic concepts, theories, principles, and quantitative methods to analyze current events
